

BIO for Alan Perlstein
Vice President/General Manager
DRS Power & Control Technologies, Inc.

Alan Perlstein became Vice President & General Manager of DRS Power & Control Technologies, Inc. (PCT) in July 2008 and has overall responsibility for profit/loss and the strategic direction of the PCT business. Alan reports directly to Roger Sexauer, President of DRS Power & Environmental Systems Group.

Alan has 30 years of experience in ship building, power electronics, design development and program control functions and spent the last two years as Vice President Program Management for DRS Power Systems responsible for the execution of all programs. Prior to this assignment, Alan was Vice President of Innovation and Planning at PCT and was responsible for the design, development, contract administration, business planning, and program control functions for navy nuclear, ship controls, propulsion, and power distribution programs. He has led the development of systems and processes for advanced business planning to ensure affordable solutions in a low production and design development environment.

Prior to joining DRS, Alan worked for General Dynamics for 20 years in various capacities, with his last assignment being the program planning and business manager responsible for VIRGINIA Class programs. He was responsible for customer interface, development of long lead funding profiles, and creating the program control schedule and cost management systems that have made the VIRGINIA Class the most successful U.S. Navy ship design program.

Mr. Perlstein is a graduate of the Kellogg School of Business at Northwestern University, with a Masters in Business Administration and of American University, with a Bachelor of Science in Economics.
